

LETTER TO THE MELVIN STUDENT

From the President Rev. Byeong

#3

"Books on the Leadership"
September 27, 2021

Today, I am reading books on the leadership plus management a lot than before. One day I found there are nice website for free-download pdf books, *oceanofpdf.com*. You may get help from this website as well. I look at those books in there and free-download and made binding book at stationary near may place.

To buy those books themselves are expensive for today and on top of that its hard to carry those books to Kenya, So I found this is the best system to make pdf books, that's pick up those books and read them itself from the website and select whether is useful or less useful. Also easy to get the books in my hands. If we'd like to buy any book, we have to order bookstores here in Korea or to the Amazon, USA. It's very inconvenient to order and to pay them by visa card, and I don't have visa card myself, so it' really easy to get books what I need from the website and make binding books. I have done many books and some were brought to Kenya already. I will do this way continually.

Studying books and preparing for teaching in Kenya is doing good here in Korea. I found some difficulties in Kenya to study for myself because there are whether is to hot, and electricities not good conditions all the time, and also no bookstores around our university, at Oyugis, Kissi and even Kisumu town...were NOT bookstores, especially to buy these leadership books are really hard to get it, so I better to pick up those books and study myself here and only teaching in Kenya, at Melvin University.

In reading these many leadership books today, I found there are one important thing. That's those who has written books were failure in their early's lives. Not everyone definitely, but mostly they failed. There were various kind of failures, by the way, in the end they found books at library and read many books especially on the prominent people in the world, their biographies, then they

found they became successful in the world. Especially those people I met in the books what I read was that they became not only successful but also they wrote many book on "self-help." That's why I am enjoying to read those books, because it really helpful for ourselves, called it self-books. Through these books, our self-growth is growing. Self-growing is important. I am not talking here about money, being a richer in the world, but spiritual richer, life itself becomes rich.

Why spiritual richness is important? People in the world are hungry for something. What is that? We can ask ourselves that "we are living in richness in mind" I think this is more accurate approach. Once we talk spirituality, I have learned personally from CPE setting that's not only in religious aspects, but every things in spirit; that is even joy, sorrow, sad, disappointment, discouraged, feeling loss, etc. So through these books, called SELF-HELP books, we can revived our those bad spiritual status.

note)

I recommended to our vice-president John Ogillah to try have students to read those nice book for their self-help.
